The electronic form of this issue, available as of January 11, 2006, at www.plantphysiol.org, is considered the journal of record.

On the Cover: Germination of pea seeds on ice. Dry pea seeds were placed on ice in a covered polystyrene box that was stored at 1.5°C. Ice was changed weekly and the photograph was taken after 6 weeks. When transferred to soil, the ice-germinated seeds developed into healthy pea plants. Such a performance is likely to be related to the amazing temperature tolerance of seed mitochondria that are able to sustain oxidative phosphorylation at subfreezing temperatures, using exogenous NADH as a substrate (Stupnikova et al., pp. 326–335).

ON THE INSIDE
Peter V. Minorsky

BREAKTHROUGH TECHNOLOGIES
Agroinjection of Tomato Fruits. A Tool for Rapid Functional Analysis of Transgenes Directly in Fruit. Diego Orzaez, Sophie Mirabel, Willemien H. Wieland, and Antonio Granell

BIOINFORMATICS

RESEARCH ARTICLES

BIOCHEMICAL PROCESSES AND MACROMOLECULAR STRUCTURES

ARABINAN DEFICIENT 1 Is a Putative Arabinosyltransferase Involved in Biosynthesis of Pectic Arabinan in Arabidopsis. Jesper Harholt, Jacob Krüger Jensen, Susanne Oxenbøll Sørensen, Caroline Orfila, Markus Pauly, and Henrik Vibe Scheller

An L1-Diaminopimelate Aminotransferase Defines a Novel Variant of the Lysine Biosynthesis Pathway in Plants. André O. Hudson, Bijay K. Singh, Thomas Leustek, and Charles Gilvarg

BIOENERGETICS AND PHOTOSYNTHESIS

CELL BIOLOGY AND SIGNAL TRANSDUCTION

Cell Type-Specific Role of the Retinoblastoma/E2F Pathway during Arabidopsis Leaf Development. Bénédicte Desvoyes, Elena Ramirez-Parra, Qi Xie, Nam-Hai Chua, and Crisanto Gutierrez

Lectin Receptor Kinases Participate in Protein-Protein Interactions to Mediate Plasma Membrane-Cell Wall Adhesions in Arabidopsis. Anne Gouget, Virginie Senchou, Francine Govers, Arnaud Sanson, Annick Barre, Pierre Rougé, Rafael Pont-Lezica, and Hervé Canut

Overexpression of RAN1 in Rice and Arabidopsis Alters Primordial Meristem, Mitotic Progress, and Sensitivity to Auxin. Xin Wang, Yunyuan Xu, Ye Han, Shilai Bao, Jizhou Du, Ming Yuan, Zhihong Xu, and Kang Chong

ABA-Hypersensitive Germination3 Encodes a Protein Phosphatase 2C (AtPP2CA) That Strongly Regulates Abscisic Acid Signaling during Germination among Arabidopsis Protein Phosphatase 2Cs. Tomo Yoshida, Noriyuki Nishimura, Nobutaka Kitahata, Takashi Kuromori, Takuya Ito, Tadao Asami, Kazuo Shinozaki, and Takashi Hirayama

Overexpression of RAN1 in Rice and Arabidopsis Alters Primordial Meristem, Mitotic Progress, and Sensitivity to Auxin. Xin Wang, Yunyuan Xu, Ye Han, Shilai Bao, Jizhou Du, Ming Yuan, Zhihong Xu, and Kang Chong

DEVELOPMENT AND HORMONE ACTION

The Protein Phosphatase AtPP2CA Negatively Regulates Abscisic Acid Signal Transduction in Arabidopsis, and Effects of abh1 on AtPP2CA mRNA. Josef M. Kuhn, Aurélien Boisson-Dernier, Marie B. Dizon, Mohammad H. Maktabi, and Julian I. Schroeder

Grapes on Steroids. Brassinosteroids Are Involved in Grape Berry Ripening. Gregory M. Symons, Christopher Davies, Yuri Shavrukov, Ian B. Dry, James B. Reid, and Mark R. Thomas

The Onset of Gravisensitivity in the Embryonic Root of Flax. Zhong Ma and Karl H. Hasenstein
ENVIRONMENTAL STRESS AND ADAPTATION TO STRESS

Increased Accumulation of Cuticular Wax and Expression of Lipid Transfer Protein in Response to Periodic Drying Events in Leaves of Tree Tobacco. Kimberly D. Cameron, Mark A. Tece, and Lawrence B. Smart 176

Pea Seed Mitochondria Are Endowed with a Remarkable Tolerance to Extreme Physiological Temperatures. Irina Stupnikova, Abdelilah Benamar, Dimitri Tolleter, Johann Grete, Genadi Borovskii, Albert-Jean Dorne, and David Macherel 326

GENETICS, GENOMICS, AND MOLECULAR EVOLUTION

Identification of a Glyphosate-Resistant Mutant of Rice 5-Enolpyruvylshikimate 3-Phosphate Synthase Using a Directed Evolution Strategy. Min Zhou, Honglin Xu, Xiaoli Wei, Zhiqiang Ye, Liping Wei, Weimin Gong, Yongqin Wang, and Zhen Zhu 184

PLANTS INTERACTING WITH OTHER ORGANISMS

Heterotrimeric G Proteins Facilitate Arabidopsis Resistance to Necrotrophic Pathogens and Are Involved in Jasmonate Signaling. Yuri Trusov, James Edward Rookes, David Chakravorty, David Armour, Peer Martin Schenk, and José Ramón Botella 210

Transcript Analysis of Early Nodulation Events in Medicago truncatula. Dasharath Prasad Lohar, Natalya Sharopova, Gabriella Endre, Silvia Peñuela, Deborah Samac, Christopher Town, Kevin A.T. Silverstein, and Kathryn A. VandenBosch 221

A Circadian Rhythm-Regulated Tomato Gene Is Induced by Arachidonic Acid and Phytophthora infestans Infection. Philip D. Weyman, Zhiqiang Pan, Qin Feng, David G. Gilchrist, and Richard M. Bostock 235

The Outcomes of Concentration-Specific Interactions between Salicylate and Jasmonate Signaling Include Synergy, Antagonism, and Oxidative Stress Leading to Cell Death. Luis A.J. Mur, Paul Kenton, Rainer Atsorn, Otto Miersch, and Claus Wasternack 249

The DMII and DMII Early Symbiotic Genes of Medicago truncatula Are Required for a High-Affinity Nodulation Factor-Binding Site Associated to a Particulate Fraction of Roots. Bridget V. Hogg, Julie V. Cullimore, Raoul Ranjeva, and Jean-Jacques Bono 365

WHOLE PLANT AND ECOPHYSIOLOGY

Analysis of Freeze-Thaw Embolism in Conifers. The Interaction between Cavitation Pressure and Tracheid Size. Jarmila Pittermann and John S. Sperry 374
