

# PLANT PREVIEW

## Article-at-a-Time Publishing

ASPB continues to build on its commitment to publishing high-quality, cutting-edge research as quickly as possible. **Plant Preview** comprises fully searchable PDFs of articles accepted to *Plant Physiology* and *The Plant Cell* that are published online as soon as proofs are corrected by authors.

**Plant Preview** decreases overall publication time by up to four weeks, greatly reducing traditional time to publication. *Plant Physiology* Preview articles can be accessed at [www.plantphysiol.org/misc/pips.shtml](http://www.plantphysiol.org/misc/pips.shtml). *The Plant Cell* Preview articles are at [www.plantcell.org/misc/pips.shtml](http://www.plantcell.org/misc/pips.shtml).

Submit your manuscripts to *Plant Physiology* and *The Plant Cell* at <http://submit.plantphysiol.org> and <http://submit.plantcell.org>.

JOHN WILEY & SONS PROUDLY ANNOUNCES

## Esau's Plant Anatomy

### Meristems, Cells, and Tissues of the Plant Body—Their Structure, Function and Development

THIRD EDITION

Ray F. Evert

This revision of the now classic *Plant Anatomy* based on the famous and pioneering work of Katherine Esau, offers a completely updated review of the structure, function and development of meristems, cells and tissues of the plant body. Beginning with a general overview, chapters then cover the protoplast, cell wall, and meristems, through to phloem, periderm, and secretory structures.

## Scientific Grade Instrumentation for Plant Biologists

OS-30P  
Chlorophyll  
Fluorometer

Non-destructive

Pulse Modulated

Cost Effective

Fv/Fm, Fo, Fm, Ft, & Kinetics

Fast - Accurate - Field Proven

GFP-Meter

- In-situ rapid detection of genetic markers & GMO.
- Green, red, cyan, yellow or other fluorescent proteins.
- Hand-held, Field portable.

CCM-200  
Chlorophyll Content Meter

- Non-destructive testing.
- Memory for up to 8,192 measurements.
- Large sensor for accurate measurements.
- Now with USB port for fast data transfer.

# PowerPlant™

## Plant DNA Isolation Kit

*Isolate quality DNA from plants including those high in polyphenols and polysaccharides*

The **PowerPlant™** DNA Isolation Kit provides a novel method for isolating high quality genomic DNA from a variety of plant tissues, such as leaves, roots and seeds. This unique hands-off homogenization uses a bead beating format and allows up to 24 samples to be processed at the same time using either a vortex adapter or a bench top homogenizer such as MO BIO's Precellys® 24 Homogenizer. Nearly all types of plant tissues can be processed without hand grinding or liquid nitrogen freezing. With this kits' novel PCR inhibitor removal system, pure genomic DNA can be obtained in less than 60 minutes.

### GIVES YOU THE POWER TO DO MORE!

- Purify DNA from PCR inhibiting materials such as polysaccharides and polyphenols
- Cost-effective hands-off homogenization through a vortex adapter and a vortex
- Extract DNA without hand grinding; eliminating the need to clean grinding tools between samples
- Includes robust customized tubes to bead beat and homogenize without tube breakage
- Compatible with MO BIO's Precellys® 24 or any bench top homogenizer

The PowerPlant™ DNA Isolation Kit is efficient with a variety of plant types.
