

CALL FOR PAPERS:

Plant Physiology Focus Issue on Vector Systems for Plant Research and Biotechnology

Deadline for Submissions: August 1, 2007

To submit an article, please go to <http://submit.plantphysiol.org>.

Plant Physiology is pleased to announce a Focus Issue on Vector Systems for Plant Research and Biotechnology to be published in December 2007. The issue will be edited by Vitaly Citovsky. Submissions in all topics of plant expression vector systems designed for state-of-the-art experimentation are welcome, including novel systems for multiple gene expression, protein tagging, induction and suppression of gene silencing, specialized vectors for monocot transformation, and virus-based vectors. Emphasis should be made on simplicity of use and applicability of the system to a wide range of model plants and crop species.

Authors interested in contributing should indicate this in the cover letter when submitting papers online at <http://submit.plantphysiol.org/>. Please select "Vector Systems (December, 2007)" from the Focus Issue list in the online submission system. Articles published within 2 years before and after the Focus Issue will be considered for inclusion in an online Focus Collection of articles relevant to the focus topic (<http://www.plantphysiol.org/misc/collections.dtl>).

Please contact Vitaly Citovsky (vitaly.citovsky@stonybrook.edu) for additional information.

Cite Track Alerts

Cite Track Alerts is a free service providing email-based alerts when new articles matching your search criteria are published in *Plant Physiology* Online, or when designated *Plant Physiology* Online articles are cited by new articles from a designated set of journals (<http://www.plantphysiol.org/help/ijlinks.dtl>).
