

The electronic form of this issue, available as of May 11, 2007, at www.plantphysiol.org, is considered the journal of record.

On the Cover: Detection of the diurnal environment requires a circadian system that is correctly integrated with the light-dark cycle. EARLY FLOWERING4 (ELF4) is required to fulfill this normal circadian function. McWatters et al. (pp. 391–401) have shown that ELF4 has two functions within the clock. ELF4 was found to be a circadian element required both for clock resetting at the evening phase of the day (the light-to-dark phase of entrainment), and it was also found to be required for persistence of clock oscillations. For the latter, ELF4 was found to be a dose-dependent activator of the morning clock genes *CCA1* and *LHY*. ELF4 is thus a core component of the circadian oscillator. The cover cartoon illustrates a plant having trouble sleeping. This caricature is indicative of *elf4* mutant defects in detecting dusk. The cartoon was drawn by Prof. Dr. Edward Himelblau at California Polytechnic State University.

ON THE INSIDE

Peter V. Minorsky

1

HIGH IMPACT

The Role of Trehalose Biosynthesis in Plants. *Aleel K. Grennan*

3

GENOME ANALYSIS

^{[WJ][OA]}Increases in the Number of SNARE Genes Parallels the Rise of Multicellularity among the Green Plants.

Anton Sanderfoot

6

BREAKTHROUGH TECHNOLOGIES

Successful Gene Tagging in Lettuce Using the *Tnt1* Retrotransposon from Tobacco. *Marianne Mazier, Emmanuel Botton, Fabrice Flamain, Jean-Paul Bouchet, Béatrice Courtial, Marie-Christine Chupeau, Yves Chupeau, Brigitte Maisonneuve, and Hélène Lucas*

18

^{[WJ][OA]}Sampling the Arabidopsis Transcriptome with Massively Parallel Pyrosequencing. *Andreas P.M. Weber,*

Katrin L. Weber, Kevin Carr, Curtis Wilkerson, and John B. Ohlrogge

32

BIOINFORMATICS

^{[WJ][OA]}A Novel Bioinformatics Approach Identifies Candidate Genes for the Synthesis and Feruloylation of Arabinoxylan. *Rowan A.C. Mitchell, Paul Dupree, and Peter R. Shewry*

43

SCIENTIFIC CORRESPONDENCE

Solar UV Radiation Drives CO₂ Fixation in Marine Phytoplankton: A Double-Edged Sword. *Kunshan Gao, Yaping Wu, Gang Li, Hongyan Wu, Virginia E. Villafañe, and E. Walter Helbling*
