On the Cover: Detection of the diurnal environment requires a circadian system that is correctly integrated with the light-dark cycle. EARLY FLOWERING4 (ELF4) is required to fulfill this normal circadian function. McWatters et al. (pp. 391–401) have shown that ELF4 has two functions within the clock. ELF4 was found to be a circadian element required both for clock resetting at the evening phase of the day (the light-to-dark phase of entrainment), and it was also found to be required for persistence of clock oscillations. For the latter, ELF4 was found to be a dose-dependent activator of the morning clock genes CCA1 and LHY. ELF4 is thus a core component of the circadian oscillator. The cover cartoon illustrates a plant having trouble sleeping. This caricature is indicative of elf4 mutant defects in detecting dusk. The cartoon was drawn by Prof. Dr. Edward Himelblau at California Polytechnic State University.
RESEARCH ARTICLES

BIOCHEMICAL PROCESSES AND MACROMOLECULAR STRUCTURES

[W][O][A] MAM3 Catalyzes the Formation of All Aliphatic Glucosinolate Chain Lengths in Arabidopsis. 
Susanne Textor, Jan-Willem de Kraker, Bettina Hause, Jonathan Gershenzon, and James G. Tokuhisa 60

[C][W][O][A] A Genomic Approach to Suberin Biosynthesis and Cork Differentiation. Marçal Soler, Olga Serra, Marisa Molinas, Gemma Huguet, Silvia Fluch, and Mercè Figueras 419

Flavonoid Biosynthesis in Barley Primary Leaves Requires the Presence of the Vacuole and Controls the Activity of Vacuolar Flavonoid Transport. Krasimira Marinova, Katja Kleinschmidt, Gottfried Weissenböck, and Markus Klein 432

Cloning and Characterization of Unusual Fatty Acid Desaturases from Anemone leveillei: Identification of an Acyl-Coenzyme A C20 Δ5-Desaturase Responsible for the Synthesis of Sciadonic Acid. Olga Sayanova, Richard Haslam, Monica Venegas Caleron, and Johnathan A. Napier 455

[O][A] Light and Metabolic Signals Control the Selective Degradation of Sucrose Synthase in Maize Leaves during Deetiolation. Quan-Sheng Qiu, Shane C. Hardin, Jacob Mace, Thomas P. Brunell, and Steven C. Huber 468

BIOENERGETICS AND PHOTOSYNTHESIS

CELL BIOLOGY AND SIGNAL TRANSDUCTION

[O][I][O][A] Participation of Endomembrane Cation/H+ Exchanger AtCHX20 in Osmoregulation of Guard Cells. Senthilkumar Padmanathan, Salih Chenroj, June M. Kwak, Xiyan Li, John M. Ward, and Heven Sze 82

[CH][W][I][O][A] E2F Regulates FASCIATA1, a Chromatin Assembly Gene Whose Loss Switches on the Endocycle and Activates Gene Expression by Changing the Epigenetic Status. Elena Ramirez-Parra and Crisanto Gutierrez 105

DEVELOPMENT AND HORMONE ACTION

[CH][W][O][A] The Rice YABBY1 Gene Is Involved in the Feedback Regulation of Gibberellin Metabolism. Mingqiu Dai, Yu Zhao, Qian Ma, Yongfeng Hu, Peter Hedden, Qifa Zhang, and Dao-Xiu Zhou 121
