

CALL FOR PAPERS

Plant Physiology Focus Issue on Plant Interactions with Arthropod Herbivores

Plant Physiology is pleased to announce a Focus Issue on Plant Interactions with Arthropod Herbivores to be published in March 2008. The issue will be edited by Georg Jander and Gregg Howe. Submissions describing novel aspects of any interaction between plants and arthropod herbivores are welcome. Emphasis should be on molecular and biochemical aspects of the interaction, including recognition of herbivory, signaling pathways that regulate host plant defense, volatile signals, tritrophic interactions, plant defense chemistry, manipulation of plant defenses by herbivores, and natural variation in plant resistance to herbivores.

Authors interested in contributing should indicate this in the cover letter when submitting papers online at <http://submit.plantphysiol.org/>. Please select "Plant-Herbivore Interactions, March 2008" from the Focus Issue list in the online submission system. Articles published within 2 years before and after the Focus Issue will be considered for inclusion in an online Focus Collection of articles relevant to the focus topic.

Please contact Georg Jander (gj32@cornell.edu) or Gregg Howe (howeg@msu.edu) for additional information.

Deadline for Submissions: November 1, 2007.

To submit an article, please go to <http://submit.plantphysiol.org>.

Download Figures

from *Plant Physiology* and *The Plant Cell*
as PowerPoint Slides!

Plant Physiology (www.plantphysiol.org) and *The Plant Cell* (www.plantcell.org), ASPB's premier plant science journals, allow you to save any figure as a PowerPoint slide! This free feature is available for all articles published since 1998.

From the full-text (non-PDF) version of an article, click to "View larger version" of a figure. Then click the button marked "PowerPoint Slide for Teaching." The slide will include the full bibliographic citation of the article in which the figure was published.

We hope that you enjoy this new feature and that it enhances the teaching of plant biology in your classroom.
