The Phenylpropanoid Pathway in Arabidopsis
Christophöer M. Fraser and Clint Chapple
December 8, 2011. Edited by Harvey Millar.

Plant ABC Transporters
Jooshyun Kang, Jiyoung Park, Hyunju Choi, Bo Bura, Tobias Kretzschmar, Youngsook Lee, and Enrico Martinoia
December 6, 2011. Edited by Harvey Millar.

Brassinosteroids (update)
Steven D. Clouse
November 2, 2011. Edited by Caren Chang.

Cytochromes P450 (major update)
Søren Bak, Fred Beisson, Gerard Bishop, Björn Hamberger, René Höfer, Suzanne Paquette, and Danièle Werck-Reichhart
October 6, 2011. Edited by Rob Last.

Small Post-translationally Modified Peptide Signals in Arabidopsis
Yoshikatsu Matsubayashi
September 26, 2011. Edited by Keiko Torii.

The Function of the CLE Peptide in Plant Development and Symbiosis
Shigeyuki Betsuyaku, Shinichiro Sawa, and Masashi Yamada
September 26, 2011. Edited by Keiko Torii.

Phytochrome Signaling Mechanisms (update)
Jigang Li, Gang Li, Haiyang Wang, and Xing Wang Deng

“Teaching Tools was created to address the stress and pressure of busy educators when they develop course material. The challenge became making the research as current as possible while giving the educator the flexibility to make it work for their students—a kind of living ‘text.’ Let us know how you might use the tools—then we know we have done our work well.”

Mary Williams
Features Editor, The Plant Cell

Teaching Tools in Plant Biology
ideas to grow on

Gymnosperm leaves
Pollination is mutually beneficial

Teaching Tools in Plant Biology, published by the American Society of Plant Biologists, combines up-to-date peer-reviewed research-based content with flexible presentation components that can be used alone or integrated into your lesson plans so that you can confidently present these exciting topics in your classroom. We’ve addressed the stress and pressure busy educators face when devising course material by providing a short essay introducing each topic, PowerPoint slides, and suggested readings. An editorial innovation from The Plant Cell, one of the most trusted names in plant biology.

Unicode Author Names in ASPB Journals

Authors submitting articles to Plant Physiology® and The Plant Cell may now include non-Latin names in their articles. When submitting an article through the Bench>Press system, authors will be prompted to provide each non-Latin name in Unicode when entering author names for the manuscript. The Unicode version entered for each author name will appear in the PDF and print versions of the article.

For more information, visit http://submit.plantphysiol.org or http://submit.plantcell.org.
Biochemistry & Molecular Biology of Plants

ASPB’s Online Image Library contains all the images from the best-selling textbook/reference work *Biochemistry & Molecular Biology of Plants*, by Buchanan, Gruissem, and Jones.

The Online Image Library features images listed by chapter plus the capability to search by individual images. And images are easily imported into PowerPoint for use in presentations.

Perpetual access to the site is available for $49.95. ASPB members receive a 20% DISCOUNT, making the purchase price for members $39.95.

To purchase the images from *Biochemistry & Molecular Biology of Plants* using our secure web site, go to http://www.aspb.org/publications/biotext/imagelibrary/. Log in as a member for your member discount. Contact info@aspb.org for more information.

Need to promote open positions, fellowship opportunities, programs, or conferences in plant biology?

Advertise in the publications of the American Society of Plant Biologists (ASPB). ASPB opportunities include:
- The Plant Cell
- Plant Physiology
- ASPB News
- ASPB Website
- Member Chatter

Advertising Benefits:
- Direct link to leading international plant scientists.
- Promote directly to the ASPB membership.
- Product and recruitment advertising are accepted.
- Email ads and print/online ad design are available.

CONTACT FASEB AdNet at 301-634-7103 or email adnet@faseb.org for an ad estimate. View ASPB rate card and full media kit at www.faseb.org/adnet.
Acknowledgment of Plant Physiology Reviewers

The editorial board and staff of Plant Physiology wish to recognize the enormous contribution made by the following scientists who provided expertise, insight, thoroughness, and prompt delivery of reviews from November 7, 2010 to December 7, 2011.

*Plant Physiology*® Among 100 Most Influential Journals of the Century!

*Plant Physiology* has been named one of the 100 most influential journals in biology or medicine of the past 100 years! To celebrate the 100th anniversary of the Special Libraries Association, SLA's BioMedical & Life Sciences Division conducted a poll of its membership to identify which journals have been the most influential. *Plant Physiology* is one of only three journals from the “Experimental Botany, Plant Physiology & Related Molecular/Cellular Plant Biology” category to make the list. Other journals listed in the top 100 include such prestigious titles as *Science*, *Nature*, and the *Proceedings of the National Academy of Sciences*. The American Society of Plant Biologists and *Plant Physiology* are proud to have received this honor. A full list of the top 100 journals can be found at http://units.sla.org/division/dbio/publications/resources/dbio100.html.

www.plantphysiol.org
Wiley-Blackwell and ASPB have partnered since 2002 to bring you the groundbreaking Biochemistry & Molecular Biology of Plants, by Buchanan, Gruissem, and Jones.

Wiley-Blackwell is now pleased to announce a collaboration with ASPB to develop a Plant Biology Book Series covering all areas of interest to ASPB members, including cell and molecular biology, genomics, proteomics, biochemistry, and physiology at undergraduate and graduate level. We are looking for potential book authors and editors to contribute to the series and would like to hear from you if you have ideas for books and would like to discuss them further.

If you would like more information on how you could be part of this exciting series, please contact our Commissioning Editor, Rachel Wade by e-mail (rwade@wiley.com).

We look forward to hearing your ideas and working with you to create a valuable resource for students and lecturers in plant biology.
