**CALL FOR PAPERS**

*Plant Physiology* Focus Issue on Ubiquitin in Plant Biology

**Deadline for Submission:** May 1, 2012

To submit an article, please go to http://submit.plantphysiol.org/.

*Plant Physiology* is pleased to announce a Focus Issue on Ubiquitin in Plant Biology to be published in September 2012. The issue will be edited by Vitaly Citovsky and Bonnie Bartel. Research article submissions on the roles of ubiquitin or ubiquitin-like modifiers in all aspects of plant biology are welcome, including development and morphogenesis, hormonal and environmental responses, chromatin remodeling and histone modifications, and plant–pathogen interactions. The issue also will include invited updates on areas of recent progress.

Authors interested in contributing should indicate this in the cover letter when submitting papers online at http://submit.plantphysiol.org/. Please select “Ubiquitin in Plant Biology (September 2012)” from the Focus Issue list in the online submission system. Articles published within 2 years before and after the Focus Issue will be considered for inclusion in an online Focus Collection of articles relevant to the focus topic.

Please contact Vitaly Citovsky (vitaly.citovsky@stonybrook.edu) or Bonnie Bartel (bartel@rice.edu) for additional information.
Wiley-Blackwell and ASPB have partnered since 2002 to bring you the groundbreaking *Biochemistry & Molecular Biology of Plants*, by Buchanan, Gruissem, and Jones.

Wiley-Blackwell is now pleased to announce a collaboration with ASPB to develop a *Plant Biology Book Series* covering all areas of interest to ASPB members, including cell and molecular biology, genomics, proteomics, biochemistry, and physiology at undergraduate and graduate level. We are looking for potential book authors and editors to contribute to the series and would like to hear from you if you have ideas for books and would like to discuss them further.

If you would like more information on how you could be part of this exciting series, please contact our Commissioning Editor, Rachel Wade by e-mail (rwade@wiley.com).

We look forward to hearing your ideas and working with you to create a valuable resource for students and lecturers in plant biology.

“Teaching Tools was created to address the stress and pressure of busy educators when they develop course material. The challenge became making the research as current as possible while giving the educator the flexibility to make it work for their students—a kind of living ‘text.’ Let us know how you might use the tools—then we know we have done our work well.”

Mary Williams
Features Editor, The Plant Cell
mwilliams@aspb.org

Titles include
• Why Study Plants?
• Genetic Improvements in Agriculture
• Plants Are Not Alone
• Plants and Arthropods: Friend or Foe?
• The Small RNA World
• Leaf Origins and Development

Teaching Tools in Plant Biology, published by the American Society of Plant Biologists, combines up-to-date peer-reviewed research-based content with flexible presentation components that can be used alone or integrated into your lesson plans so that you can confidently present these exciting topics in your classroom. We’ve addressed the stress and pressure busy educators face when devising course material by providing a short essay introducing each topic, PowerPoint slides, and suggested readings. An editorial innovation from The Plant Cell, one of the most trusted names in plant biology.

PowerPoint slides • Lecture notes • Customizable Peer reviewed • Current and up-to-date

Unicode Author Names in ASPB Journals

Authors submitting articles to *Plant Physiology*® and *The Plant Cell* may now include non-Latin names in their articles. When submitting an article through the Bench>Press system, authors will be prompted to provide each non-Latin name in Unicode when entering author names for the manuscript. The Unicode version entered for each author name will appear in the PDF and print versions of the article.

For more information, visit http://submit.plantphysiol.org or http://submit.plantcell.org.

FASEB AdNet  The Advertising Network for the Life Sciences

Need to promote open positions, fellowship opportunities, programs, or conferences in plant biology?

Advertise in the publications of the American Society of Plant Biologists (ASPB). ASPB opportunities include:

- *The Plant Cell*
- *Plant Physiology*
- *ASPB News*
- *ASPB Website*
- *Member Chatter*

Advertising Benefits:

- Direct link to leading international plant scientists.
- Promote directly to the ASPB membership.
- Product and recruitment advertising are accepted.
- Email ads and print/online ad design are available.

CONTACT FASEB AdNet at 301-634-7103 or email adnet@faseb.org for an ad estimate.

View ASPB rate card and full media kit at www.faseb.org/adnet.
